

## Never Again?

### –IBM, Bill Gates and Eugenics–The Biological Control Circuit–

“We are very much like the physician, in that we dissect, cell by cell, the German cultural body. We report every individual characteristic...on a little card... We are proud that we can assist in such a task, a task that provides our nations Physician with the material he needs for his examinations. Our physician can then determine whether the calculated values are in harmony with the health of our people. It also means that if such is not the case, our physician can take the corrective procedures to correct the sick circumstances...” – Willy Heidinger *Head of IBM Operations Nazi Germany*

By 1933 Germany had race data, family history, occupation, bank records and sexual orientation for most of the German population and this was just the beginning, with every census the number of data points on each citizen increased. With this data the 3rd Reich was able to precisely track, surveil and **round up** minorities to be taken to **concentration camps**. These included trade unionists, Roman Catholic and Protestant dissidents, communists, Jews and Gypsies. Described by Goebbels in 1934 as:

*"camps to turn antisocial members of society into useful members by the most humane means possible."* *Joseph Goebbels– Reich Minister of Propaganda*

In the concentration camps many people were given a **tracking number in the form of a tattoo** which was linked to a card carrying their personal data and then processed using IBM punch card tabulators, the precursor to the computer. Each individual was controlled by the data on

the punch cards. For example: 2— was a Jehovah’s Witness. 12—was a Gypsy. 8—was a Jew, and so on. They were then assigned a status: A1-released, B2-transferred and so on. Code F—6 was special treatment. The ticking heart of the Nazi war machine was IBM punch card data processing systems (computers\*\*). A D11(VZ) calculating tabulator could process 12,000, 60 column punch cards per hour. Millions of new punch cards were needed each week to feed the tabulators.

“No one would escape, this was something new for mankind, never before had so many people been identified so precisely, so silently, so quickly and with such far reaching consequences. The dawn of the information age began at the sunset of human decency.” *Edwin Black—IMB and the Holocaust*

The COVID19 tracking app is planned as a stepping stone towards a combined vaccine and record of vaccination implant. A DNA altering vaccine, delivered using microneedles, may, depending on public reaction include quantum dots. The quantum-dot tattoo involves applying dissolvable sugar-based microneedles that contain a vaccine and fluorescent copper-based quantum dots embedded inside biocompatible, micron-scale capsules. The encapsulated quantum dots serve as an on-person vaccination record that can be read at a distance thus serving as part of the surveillance infrastructure that we are surrounded by. Rice University described the quantum dots that are left behind after the administration of the vaccine as:

“Something like a bar-code tattoo” [Rice University](#)

The only information that the quantum dots would need to generate is the vaccine serial number or ID 2020 number. This would link a person to their online medical information in the cloud. Apiject’s vaccination technology allows for a similar level of surveillance without on body identification:

“With an optional RFID/NFC tag on each BFS prefilled syringe, ApiJect will make this possible. Before giving an injection, the healthcare worker will be able to launch a free mobile app and “tap” the prefilled syringe on their phone, capturing the NFC tag’s unique serial number, GPS location and date/time. The app then uploads the data to a government-selected cloud database. Aggregated injection data provides health administrators an evolving real-time ‘injection map’.” [Apiject](#)

Each vaccines unique serial number could be linked to the recipients medical records and in turn their mobile phone with built in contract tracing app. Will those who do not submit to surveillance and vaccination, over time to be ostracised from society and marginalised, their freedoms limited?

“..we’ll restore the ability to socialize safely by developing more sophisticated ways to identify who is a disease risk and who isn’t, and discriminating—legally—against those who are.” *MIT Technology Review—We are not going back to normal*

Think about how the Nazis started to separate out the Jewish population, only this time will it be free thinkers and those who do not accept vaccination? If this situation is allowed to continue will people who do not submit be branded ‘murderers’?

An aspect of Nazi propaganda was to label Jewish people as disease carriers, racial impurity was a public health issue.

*Nazi Health Pass*

Hundreds of thousands of [contract tracers](#) around the [world](#) plan to track, isolate and potentially [remove](#) people if required.

“It is fair to say things won’t go back to truly normal until we have a [vaccine](#) that we’ve gotten out to basically the entire world.” *Bill Gates- Fox news interview*

Without a work book Jewish people were not permitted to work. Without this identification they could not obtain ration cards to purchase food.

"Eventually we will have some [digital certificates](#) to show who has recovered or been tested recently or when [we have a vaccine](#), who has received it". *Bill Gates- when asked: 'How should we determine which businesses should stay open?'*

Even without a vaccine the [COVI-PASS](#) health passport system, if fully implemented would mean the [mass surveillance](#) of every man woman and child in real time.

“The [VCode®](#) can be scanned at distance (in some uses over [100meters](#)).” *COVI-PASS*

In New Zealand legislation known as the [COVID-19 Public Health Response Act 2020](#) gives:

“..extraordinary powers — unheard of powers — to the Prime Minister,” said O’Connor. “Basically, this bill allows one person in a democratic country the complete right to decide where you go, who you see, how you operate, when you open your business, whether you can [go to church](#), (and) what sport you can play [...] It allows the police, the New Zealand police, to enter your home without warrant”– *MP Simon O’Connor New Zealand*

ID2020 is a project funded by The Rockefeller Foundation, Microsoft, Accenture and others. It aims to give every human being on earth a unique identification number; [immunisation being an entry point for digital identity](#). The idea of giving people and objects ID numbers is not a new one. Dehomag the German subsidiary of IBM in Nazi Germany developed coding systems for virtually all raw materials and finished goods. This coding system, processed using IBM tabulating machines made it possible for the Nazis to organise its seizure of Jewish property with stunning specificity. The IBM formulation for the bar code later became the standard system that is still in use today.

Anyone [considering](#) taking a [vaccine](#) that [Bill Gates](#) has had anything to do with should be aware of his previous [vaccine crimes](#) and [conflicts of interests](#). In fact he openly admits that [700,000 people](#) would be [inadvertently affected](#) (injured) by a vaccine. Here he is referring to damage caused by traditional vaccines. If DNA/RNA vaccine technology is used then it is [impossible to say](#) what will result as they have never been on a mass scale before.

“I.G.T. is altogether different from traditional vaccination. It is instead a form of gene therapy. Scientists isolate the genes that produce powerful antibodies against certain diseases and then synthesize artificial versions. The genes are placed into **viruses** and injected into human tissue, usually muscle. The viruses invade human cells with their DNA payloads, and the synthetic gene is incorporated into the recipient’s own DNA. If all goes well, the new genes instruct the cells to begin manufacturing powerful antibodies.” *Protection Without a Vaccine – New York Times*

[Bearing in mind](#) Bill Gates’s [interest](#) in [population reduction](#), his family connections to [IBM](#) and [planned parenthood](#), an organisation founded by Eugenics Society member [Margaret Sanger](#), his role within the [Global Vaccine industry](#), that his foundation also funds [ID2020](#) and [injectable medical tattoo development](#) and that he stands to make a [truly incredible amount of money](#) from testing and a global vaccination; shouldn’t we question his true motivations? He is involved in every single aspect of COVID19, both the [preparations](#) and proposed [solutions](#). Are his actions and those of the WHO, who he also funds, really for the benefit of mankind or is there [another agenda](#) hidden behind the media gloss of philanthropism?

Bill Gates’s Farther was on the board of planned parenthood and his Mother, Mary Maxwell Gates sat on the board of United Way of America with IBM CEO John Opel. In 1980, IMB, at that time the world’s most powerful corporation, formed a partnership with Microsoft who then went on to the became the most powerful software company in the world. If IBM had developed their own software, they would have ended up having a complete monopoly violating [antitrust](#) laws. Thomas J Watson, the founder of [IBM](#), supported [Hitler](#) for as long as he was able. His granddaughter, Jeannette Watson, married Alexander Sanger, Margarat Sangars grandson.

Are [genetics](#) and transhumanism just [new words](#) for [eugenics](#)?

“Eugenics is a movement that is aimed at improving the genetic composition of the human race. Historically, [eugenicists](#) advocated selective breeding to achieve these goals. Today we have technologies that make it possible to more directly alter the genetic composition of an individual.” *Genetics Generation*

Transhumanism was a phrase coined by Julian Huxley, Aldous Huxley’s brother.

"I believe in transhumanism: once there are enough people who can truly say that, the human species will be on the threshold of a new kind of existence, as different from ours as ours is from that of Peking man. It will at last be consciously fulfilling its real destiny." *Julian Huxley. In New Bottles for New Wine, pp 13-17. London: Chatto & Windus, 1957*

[Genomics England](#) is researching genetic [susceptibility](#) to the corona virus. An aspect of this work being the reaction of different racial groups to the virus and that unique approaches may be required.

### [Microsoft Is Buying COVID-19 Patients' Blood for Biotech Research](#)

It has been said that people's data is the most [valuable commodity on Earth](#), and for good reason. In [Google's 'The Selfish Ledger'](#), they state that with enough data it would be possible, through behavioural sequencing, to program society in the same way as we alter the genome through genetic sequencing.

"As gene sequencing yields a comprehensive map of human biology, researchers are increasingly able to **target parts of the sequence** and modify them in order to **achieve a desired result**.

As patterns begin to emerge in the behavioural sequences, they too may be targeted. The ledger could be given a focus, shifting it from a system which not only tracks our behaviour, but offers direction towards a desired result." – Google [The Selfish Ledger](#)

Highly accurate virtual simulations can already be built; effectively predicting the future and that is without the use of [quantum computers](#). Giant [data centres](#) have enough capacity and have done for many years, to store and process all [relevant](#) data flowing through the internet. Email, video, phone calls, [social media connections](#), text, bank transactions, search histories, [location data](#), CCTV [footage](#) etc. What is all this data used for? A white paper written in 2005 gives us some idea. The Sentient World Simulation (SWS) is a project involving Purdue University and the US Military, it set out to:

"Develop a set of intelligent agents and tools that will continually monitor the global flow of information in all forms and from all sources, evaluate it, and incorporate it within the running model to calibrate the model and predict entity actions within the model[...]

SWS activities would meet the growing needs of the interagency community, substantially help progress in existing initiatives, and enable [DoD](#) to achieve decision superiority in this critical area[...]substantial federal investments are being made in different aspects of [PMESII](#) and [DIME](#) that can be integrated into SWS[...]

SWS is a continuously updated mirror of the real world that can extrapolate into the future. SWS reacts to actual events that occur in the real world and incorporates data that is newly sensed in the real world. SWS provides the ability to examine the likely progression of the status-quo as well as explore any 'what if' scenarios. SWS consists of a synthetic environment that mirrors the real world in all aspects of national power—Political, Military, Economic, Social, Information, and Infrastructure. Within the synthetic world are models of individuals, organizations, institutions,

infrastructure, and geographies that represent the traits and mimic the behaviours of their corresponding real world counterparts. (You)

As the models influence each other and the shared synthetic environment, behaviours and trends emerge in the synthetic world as they do in the real world. Analysis can be performed on the trends in the synthetic world to validate alternate worldviews. Many of the core enabling technologies to develop SWS already exist and are currently being used by Federal agencies. These technologies include: Operational Net Assessment, Synthetic Environment for Analysis and Simulation. Additionally, SWS is bridged to kinetic simulations such as: Joint Semi-automated Force (JSAF), Joint Warfare System (JWARS), Joint Conflict and Tactical Simulation (JCATS), One Semi-automated Force (OneSAF) and would utilize these models where appropriate.”– *Sentient World Simulation White Paper*

- D12 Tabulator 1933 -

“Some governments and corporations for the first time in history have the power to basically hack human beings. There is a lot of talk about hacking computers, hacking smart phones, hacking bank accounts but the big story of our era is the ability to hack human beings, and by this I mean that if you have enough data and you have enough computing power you can understand people better than they understand themselves and then you can manipulate them in ways that were previously impossible and in such a situation the old democratic system stops functioning. We need to re-invent democracy for this new era in which humans are now hackable animals. You know the whole idea that humans, you know have this soul or spirit and they have free will and nobody knows what’s happening inside me so whatever I choose whether in the election or whether in the super market this is my free will, that’s over.” – [Yuval Harari](#)

The control of society through electronic means is quite real and highly advanced. [Social media](#) could be seen as one of many input points of an advanced ‘[feedback circuit](#)’ allowing for the real-time adjustment and programming of the social organism. Watching the selfish ledger and [the Minds of Men](#) documentary will show that this is no theory. Strategic Communication Laboratories (SCL), Cambridge Analytica’s parent company had access to

secret [MoD information](#) and used rudimentary versions of this technology to control citizens thinking using the 5000 data points they claimed to have had on every US citizen. They also worked for the leave EU campaign, the implication being that British intelligence wanted Brexit. ‘[The Great Hack](#)’ documentary about Cambridge Analytica barely scratches the surface.

“Cambridge Analytica/SCL has board members that include British Intelligence, British Psychological Warfare specialists, weapons manufacturers, friends and relatives of the Queen, ex Special forces, ex US marines and a plethora of right wing lords, Tory MPs and elites working with links to the British establishment. They boast of overthrowing governments and altering outcomes of elections in over 100 countries by microtargeting, spreading propaganda and leveraging false enemies. Its clients include the MOD, DOD, US Governments, UK Governments and NATO.[...] The methods of SCL and Cambridge Analytica are under export control by the British Government and are considered a psychological weapon that has to get approval from the British Government before being deployed.” *Neil Sanders— Cambridge Analytica, The Data Deception and the Web of Popularism.*

JTRIG, a [GCHQ program](#) is just one example of a [governmental](#) agency whose job is perception management through [any means necessary](#). [1](#) [2](#) [3](#) [4](#). [Nudge units](#) are another example of how behavioural science is applied in modern governance.

*SAGE’s behavioural science sub-group SPI-B, who were [advised by Google’s AI division](#), produced [a document](#) (Options for increasing adherence to social distancing measures) outlining [psychological manipulation operations against the UK public](#). The Scientific Advisory Group for Emergencies (SAGE) is co-chaired by Sir Patrick Vallance (the Government Chief Science Advisor) and Professor Chris Whitty (the Chief Medical Officer). Within the SPI-B document they write that there are nine: “broad ways” of achieving behaviour change: Education, Persuasion, Incentivisation, Coercion, Enablement, Training, Restriction, Environmental restructuring, and Modelling.*

In the future, through [computer brain interfaces](#) and genetic alteration people’s minds and bodies would become part of the [control circuit](#), the input and output of data being read and written in real time, the feedback loop could be adjusted accordingly for a desired outcome.

“If you look at our planet from space, what you see is something like a neural network with the cities as its nodes, and that is as good an image of the planet as a complex system of systems as one could hope for.” [IBM](#)

What IBM do not mention in this quote is that the internet of bodies and [every living thing](#) is planned to be part of that [neural network](#).

The documentary, [Exposing China's Digital Dystopian Dictatorship](#), shows how data and surveillance can also be used for more obvious forms of control.

The [control mechanisms](#) of today, as outlined, do not require the overt physical force used in the past and are arguably much more effective. The entire world has been brought under [authoritarian control](#) and not a single bullet has been fired. The objective of the 3<sup>rd</sup> Reich was [absolute power and control](#). The brutal experiments of fascism and communism in the last

century were destined to fail, if oppression is too obvious then people will at some point rise up. What would a perfected system of control look like?

"The perfect dictatorship would have the appearance of a democracy, but would basically be a prison without walls in which the prisoners would not even dream of escaping. It would essentially be a system of slavery where, through consumption and entertainment, the slaves would love their servitudes."— *Aldous Huxley in 1931*

The [State propaganda](#) perpetuated by the [media](#) about [COVID19](#) has convinced citizens, [police](#), contact [tracers](#), military and the good people of the world that the loss of freedoms and sweeping societal changes mandated by Governments are [justified](#).

Will those who do not accept the vaccine and potential vaccine tattoo be perceived like Jewish people and other minorities in fascist Germany, seen as impure disease carriers? Those accepting loss of freedom and vaccination for the '[greater good](#)' painted as selfless and brave human beings?

"In the past, fascist politics would focus on the dominant cultural group. The goal is to make them feel like victims, to make them feel like they've lost something and that the thing they've lost has been taken from them by a specific enemy, usually some minority out-group or some opposing nation. Jason Stanley— *How Fascism Works the Politics of Us and Them*

Do we have the courage to find out the [truth](#), to be vigilant and have [discrimination](#)? [Physiological warfare](#) involves controlling all sides of any debate. Using AI, realtime modelling of current events can predict likely outcomes, new data collected can be used to create new narratives, the best one chosen to correct any deviation from the objective. Truths, half-truths and lies will be found in mainstream and alternative media. To the system they are simply data points to be used within the feedback loop of the control circuit. No one is going to give you all the answers, only through proper thinking will you find the way to them in your heart.

David O'Hagan

May 2020

[Option3.co.uk](http://Option3.co.uk)

Update. March 2021.

"This week, the [State of New York](#) shared that it began a pilot program based on [IBM's Digital Health Pass](#) powered by blockchain. The aim is to eventually provide New York residents a simple, voluntary, and secure method for showing proof of a negative COVID-19 test result or certification of vaccination... The IBM Digital Health Pass conforms to IBM's high ethical standards..." — IBM *Digital Health Pass*

“LA Schools to Track Every Kid Using Microsoft’s ‘Daily Pass’ COVID App.”  
– [Children’s Health Defence](#)

\*\*IBM tabulators, duplicators, electrical key punchers, summary punches, key punch verifiers were all components of what were effectively computers. Computers today are used far more for data processing and simulation than as calculators.
